10. Capacity is measured in terms of _____ and _____.

II. Learn and write table - 13.

Class-4: EVS

Day-16

Date:20.04.2020

Modes of transport:

Transportation is moving from one place to the other, human or goods. Usually these are of three types- land, water and air.

Let us now see few new types of transportation used by people in different parts of our country.

Trolley: (ropeway) This is used in mountains or hills, to travel from one place to the other. Where the other modes cannot be used as there may be a valley or river between the mountains.

Vallam: There will be lot of water in the state of Kerala, called backwaters, people use these boats to travel locally. There is a public water transport department in the state by name- Kerala State Water Transport Department (SWTD).

Camel cart: Camel is the ship of the desert. As any other animal or any vehicle can't move on the sand dunes, carts pulled by camel are used for travelling and transporting goods.

Other states, where there are plains, use bullock cart. Mostly in rural areas.

Jugaad: The front looks like a motorcycle but the carriage at the back is made out of planks of wood. Popularly known as phut-phut-phut, this kind of vehicle is used in most of the northern states. It is made mostly out of waste material.

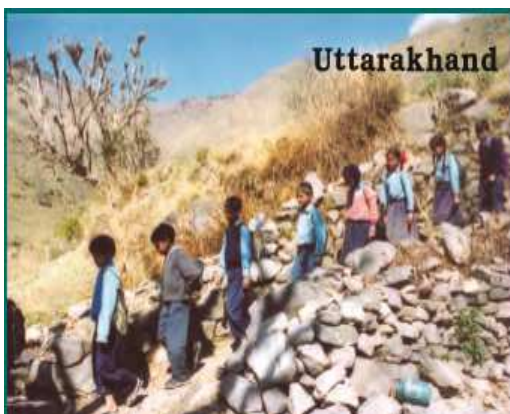

Few places are not even suitable for using any of the vehicles. In such places people move from one place to another by walk.

This picture shows people walking through the jungle as they can't use any other mode of transport. This kind of situation is generally in the states near the foot of Himalayas.

Here the girls are walking hand in hand as they can't balance themselves alone on the snow covered mountains.

These are the mountains covered with rocks, where travelling on a vehicle is not possible at all.

Activity: Name the state where the following vehicles are used.

1. Ropeway : _____

2. Jugaad : _____

3. Vallam : _____

4. Camel cart : _____

5. Bullock cart : _____

6. Name the Kerala state public water transport department:
