Your class was taken to barren land in the vicinity to participate in a green drive under which school children planted saplings. Make a diary entry, in about 100 words, recording the events.

5 th July 2021, Saturday, 10 p.m. Dear Diary, I feel a proud citizen of India, today. I was one among many school children who participated in a highly commendable initiative of providing a green lung to our city. A lot is being said about the poisonous air that the residents of the city are breathing. The delays in the implementation of corrective measures being taken by the government are only making matters worse. In such a scenario, the local initiative of planting saplings which would act as a carbon sink and supply oxygen to a vast population in the years to come is truly praiseworthy. The thought of having done my bit for the betterment of the society fills my heart with pride and satisfaction. I shall continue to contribute in whichever way I can, all my life. Ravi
