

Teacher's Motivation influences Students' lives

“The struggle you are in today develops the strength for tomorrow.” Generally, when someone is talking about teacher-student relationship, an academic achievement is what comes to mind. What is the most powerful tool of a teacher?

Encouragement is one of the powerful tools that a teacher can use. It is the key to unlock the hidden potential in children like hidden energy in converting states of matter from solid to liquid, liquid to gas and vice versa. Students, whose teacher is encouraging them, will have better progress and be more interested in the subject. The encouraging words and actions have the power to motivate them to succeed. Sometimes, being under the wing of teacher, students can resolve how to handle themselves in different situations more effectively.

We should never underestimate the investment that we make for ourselves today. Teacher should create **confidence** in students to handle any type of situations not only in learning process even in their future life. They should know that their teacher's analyses and support to make them understand the concept by giving practical or live examples, explaining about case studies by making them feel and understand in a better way from their surroundings and explaining how to apply the concept in exams and also in society helps them to carve a better life for themselves. If children become aware of their duties, rights and responsibilities they will be better equipped to face society.

Everything helps in development of student's personality and who they can be in the future to build good nation. When someone wonders about something, then the question arises. Why? How? From Aristotle to Abdul Kalam all inventions and discoveries were done by analytical thinking skills. So, what can a teacher do for students? Teacher, can teach students by instilling confidence, motivating, facilitating, guiding and helping to enhance their thinking skills. A teacher must value their opinions and believe them, students can do wonders just by paying attention during learning process.

A good relation between Student-Teacher includes safe learning environment, good communication, mutual respect, a positive and patient attitude. Bond between a student and a teacher inspires a person throughout his/her life. Did you have any one teacher at your school that turned your life? Well, this may be the good time to thank them and never lose touch with them in the future.

A word of **ENCOURAGEMENT** during a failure is worth more than an hour of praise after success.

“Success is not final, Failure is not fatal: It is the Courage to Continue that Counts.”

D. Jahnavi, Teacher
Sri Vamshidhar High School
